G A S K E T S

(Replacement Elements CFO100 and CFO101)

A gasket kit, part number CFO-205 is packaged with each CFO100 and CFO101 oil filter. The kit contains a copper gasket, a square rubber gasket and a flat rubber gasket, all of which are used to prevent oil leaks in the filter housing assembly.

We have determined that some square gaskets may have been manufactured thicker than called for in our specifications. Please check the thickness of this gasket against the illustration at the right, and return any non-conforming gaskets to the address below for exchange:

W.L. Austin
Champion Aviation Products
1230 Old Norris Road
P.O. Box 686
Liberty, SC 29657

Footnote:

All filters with a date code having four (4) characters only should be inspected. Filters with this type of date code are at least ten (10) years old.
