## Champion Aerospace makes it fast and easy to get the right technical data for the job.

Liberty, SC– Champion Aerospace announced today the launch of a comprehensive technical publications database that will make finding the information that customers need easier and faster. Publications are available to help aviation technicians stay on top of any ignition or filter repair project for piston and turbine applications.

We offer a unique approach to finding documentation as it optimizes the user experience while searching only your area(s) of need. As part of Champion's continued efforts to be the easiest company in the aviation industry to do business with, this database provides customers instant results to ensure that they have the right documentation for the job. Chris Alfonso, Director of Sales and Marketing at Champion Aerospace adds "This development gives our customers unprecedented access to our vast library of technical data that we have accumulated over 100 years of expertise. We have quick links to our most popular documents and most content is available for free and we also have subscription-based publications".

Please visit <http://www.championaerospace.com/champion-technical-publications> to access the database.

### About Champion Aerospace-

Champion Aerospace LLC, a wholly owned subsidiary of TransDigm Group (NYSE:TDG), is a leading global designer, producer and supplier of aircraft ignition system technology and airframe power solutions for use on nearly all commercial, piston and military aircraft in service today. Champion ignition components powered the Wright brothers first powered flight in 1903 and have continued to power the skies ever since.
